Materials List:

22" x 14" x 1" EPS Foam Sheet
22" x 14" x 1/2" EPS Foam Sheet
Acrylic Paint, Suggested Colors Include: Red, White, Blue, Peach
Cottonballs
Glitter (Optional), Suggested Colors Include: Red, Silver, Blue
Googly Eyes (Optional)
Paint Stick/Large Popsicle Stick (Optional)

Instructions:

Adults – help kids when using the Hot Wire tools

1. There are two ways you can make Uncle Sam – he can either be a mask or just a decoration, so plan on cutting out the eye-holes if you would like to make a mask, or leave them intact and paint on the eyes or add googly eyes to make him a décor item.
2. To begin, tape or pin the pattern onto the foam and poke holes around the edge of the pattern with a pen or the HWFF Engraver. If you would like to reuse the pattern, you may cut out the pattern pieces with scissors and transfer the patterns to the foam by tracing around each piece using a fine point marker. The main portion of the pattern (Uncle Sam's face and hat) will be cut out of 1" foam and the accent pieces (the hat band, moustache, beard and hair) will be cut out of 1/2" foam. Using the HWFF Hot Knife, cut out each piece.
3. Paint the pieces as desired with acrylic paints and set aside to dry completely.
4. If desired, apply glitter and set aside to dry completely.
5. Assemble the pieces and glue together with the HWFF Foam Fusion or StyroGoo glue. Set aside to dry completely.
6. Once everything is dry, stretch out some cottonballs and glue them to the hair, beard and moustache and let dry. If desired, you may add a paint stick or large Popsicle stick to make the mask easier to hold.
