

3D Scroll Table

The dream machine.

Big and sturdy combination Scroll Table, Router, Lathe and Milling Machine. 2 foot diameter plastic base offers an 11.5" high and unlimited horizontal cut. This will bring you to new levels in creativity. Your imagination is your only limit! Popular with professional modelers and architects.

- Quick and easy straight, freehand or template cutting.
- Change direction of cut instantly, and the blade angle adjustment is infinitely variable.
- Vertical Lathe for cylinders, cones or dimensional columns.
- Includes Stationary Fence for controlled slicing and unique Travelling Fences for controllable complex angles.
- Long 11.5" Vertical Blades for unlimited length horizontal cuts.
- Ultra fine Precision Blades slice foam paper thin.
- 8" shapable Router Blades for contoured moldings of unlimited length.

Shape the Blades!
